

Eliminate. Automate. Integrate.

Fuel Tax Reporting is a new *LoadTrak*™ Vehicle Tracking feature that uses GPS and geofencing technology to efficiently gather information for fuel tax reporting.

ELIMINATE

- Save money by significantly reducing or potentially eliminating the outsourcing of Fuel Tax calculations.
- Drivers no longer need to manually record the odometer reading whenever they cross a provincial or state border.
- Eliminate recording errors resulting from manual data entries.
- Reduce potential accidents caused by drivers focusing on the odometer.

AUTOMATE

- Odometer recordings are automatically transmitted to the *LoadTrak* Data Centre on a regular basis so you don't have to wait for the driver to return from a trip to receive the information.
- Automatic, accurate distance-travelled information is listed for each vehicle and broken down by province and state — anytime you need it.
- Re-direct employee efforts to focus on other tasks.

INTEGRATE

- Import the distance-travelled data directly into your existing Fuel Tax software program to simplify and accelerate reporting to the International Fuel Tax Association (IFTA).

The *LoadTrak* solution is provided by **SaskTel**, a provincial communications company with over 96 years of experience and more than one million customers. Feel confident in your investment knowing that, with SaskTel you get stability, security, innovation, and excellence.

For more information on the *LoadTrak* solution or to contact the dealer nearest you, visit www.loadtrak.com or call 1-866-LoadTrk (1-866-562-3875).

***LoadTrak* service uses geofencing technology around every state and every provincial border to efficiently gather accurate information for fuel tax reporting.**
